# How to pair your bridge to Siri

Make sure that you have the latest Philips Hue app.

If you've upgraded to a new bridge, first transfer your settings.

Follow the instructions in the app to connect to your Philips Hue bridge

If you've paired to the new bridge, you will be notified to setup Siri Voice Control.

Tap 'Pair Bridge'

Otherwise, go to the Settings menu to pair your bridge to Siri.

Tap 'Siri voice control'

Aim the camera at the bottom of your bridge. The pairing code will automatically be recognized.

The bridge will be added as 'Accessory'.

In case the pairing via the camera does not work, you can manually pair the bridge by entering the code on the bottom of the bridge.

You successfully paired your bridge to Siri!

Testing if Siri is set up correctly.

## Available Siri Voice Commands

At this point you can use the following Siri Voice Commands:

- Turn on my lights
- Turn off my lights
- Dim my lights to [xx]%
- Dim my lights
- Set my lights to [color]

For additional information on Siri voice control, please visit [support.apple.com/HT204893](http://support.apple.com/HT204893)

**PHILIPS**

# How to use Hue lights with Siri

Philips Hue offers the possibility to change the light names in Siri.

This requires your bridge to be paired to Siri. (refer to "How to pair your bridge to Siri")

You can export the names of your lamps to control them via Siri Voice Commands (refer to "How to control individual lights with Siri")

Open Siri Voice Control.

Tap 'Siri voice control'

This menu shows the Siri Voice Commands that can be used to address individual lamps.

Select 'Lights'

Lists the light names that can be used as Siri Voice Command.

Go to the Settings menu to set up light names. You can change the names into something simpler.

Tap 'Siri voice control'

Note:  
For the best results we recommend that you use names for lights in the same language as you set Siri to.

Tap a light to change its name.

We recommend using short and simple names.

Provide the new name. (e.g. Reading lamp, ...)

Navigate to 'Settings > Siri Voice Control' and select 'Lights'.

The exclamation marks indicate that names have been changed. Tap each light to update the Siri Voice Command.

## Available Siri Voice Commands

This enables the following Siri Voice Commands:

- Turn on my [lamp name] (e.g. "Turn on my Sofa lamp")
- Turn off my [lamp name] (e.g. "Turn of my Reading lamp")
- Dim my [lamp name] (e.g. "Dim my Bedside lamp")
- Dim my [lamp name] to [xx]% (e.g. "Dim my Bedside lamp to 90%")
- Set my [lamp name] to [color] (e.g., "Set my Cooking lamp to orange")

For additional information on Siri voice control, please visit [support.apple.com/HT204893](https://support.apple.com/HT204893)
